

# Mix Kit Pulsar

Professional Audio

## Description

This kit has **4 Mega Fuser Bass Traps** and **8 Pulsar absorption Panels**. It is a complete solution for treating rooms that are less than 6 square meters in size. Bass Traps are considered to be one of the best optimized solutions when treating low frequencies. They are also an excellent complement to other acoustic products.

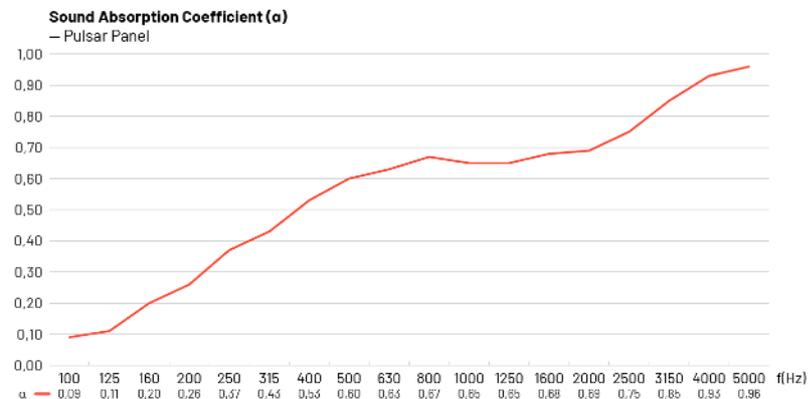

Used in a pattern or in single units, the Pulsar absorption panels offer excellent absorption characteristics with a great deal of diffusion.
