

VicSpacer Plus

PUBLIC SPACES / HI-FI & HOME CINEMA / PROFESSIONAL AUDIO / WORKSPACES

Description

VicSpacer includes 8 extra PET panels, to further improve the performance of Flat Panel VMT. By using one additional layer of PET to increase absorption, this new accessory will help to deal with the most demanding acoustic challenges, with a sustainable solution made mainly from recycled plastic.

The new fixation system used by VicSpacer Plus makes Flat Panel VMT compatible with the VicFix fixation system, either the VicFix Mini or the J Profile System, already being used on other Vicoustic's solutions. VicSpacer can be installed in the ceiling (using VicFix J Profile 2m) and it is possible to use it as Bass Trap, by placing it in the corners (using VicFix Corner Plus). Made from wood and lacquered steel, it was designed to cover the white sides of Flat Panel VMT in a stylish and visually appealing way, available in White, Black and Grey Matte.

VicSpacer will need to be combined with Flat Panel VMT of 20 mm thickness (not included).

Performance

NRC: 0.95 (VicSpacer Plus + Flat Panel VMT 20mm)

Available Finishes*

Matte Colors

* Different batches may show a color variation
