

VicAudiophile VMT Kit HF

No matter how efficient a Hi-Fi system is, if room acoustics is not properly addressed, you will end up hearing more energy coming from the room than from the loudspeakers.

VicAudiophile VMT Kit was developed to improve room acoustics with 4 Flat Panel VMT with VicSpacer Plus MKII, for enhanced absorption performance, 4 units of VicPattern Ultra Wavewood MKII and 2 units of Multifuser Wood MKII 64, for sound diffusion, available in 3 different finishes (Natural Oak, Brown Oak and White Matte).

Depending on your goals, available space and budget, you can improve the acoustics of your room, either all at once or in different steps, by acquiring one or several kits. You can start with one kit to treat first reflections from side and front walls, step forward to improve ceiling treatment with a second kit and fully treat your room including back walls in a third step.

You can change the configuration of your room anytime. Thanks to the VicFix J Profile fixation system, you can alternate sound absorbing and sound diffusion panels depending on your preferences or if you are listening to Classical or Popular Music. Using VicFix Corner, you can also use VicSpacer Plus MKII with Flat Panel VMT and VicPattern Ultra Wavewood MKII as bass trap in the corners.

Technical Information

Dimensions: Flat Panel VMT: 1190×595×20mm / 46.8"×23.4"×0.8"; VicSpacer Plus MKII: 1194×599×66mm / 47"×23.6"×2.6"; VicPattern Ultra Wavewood MKII: 595×595×50mm / 23.4"×23.4"×1.97"; Multifuser Wood MKII 64: 595×595×143mm / 23.4"×23.4"×5.63" (L×H×W, per panel); VicFix J Profile: 10×20×595mm / 0,39"×0,79"×23,4"; VicFix Corner: 80×83×21.5mm / 3,15"×3,27"×0,85"
