

Flexi Kick Drum

PROFESSIONAL AUDIO

Description

Flexi Kick Drum is the ideal solution for hassle-free acoustic control of Kick Drums. The flexible foam panel fits inside the drum, acoustically dampening the internal reflections from its shell. While physically dampening any additional harmonics from the drum's front and rear skins. The panel's density and multi-cavity design help create the right attack and control the sound of the kick drum without compromising its "character". Flexi Kick Drum is designed to fit any size of bass drum. Simply follow the supplied diagram for cutting the foam according to the required size. The whole process takes a matter of minutes!

Available Finishes

N/A

Dimensions**

595x509x55mm / 23.4"x20"x2.2"

** For each panel. Please notice that the dimensions of these panels have a tolerance of +/- 2mm

Packing Information

Units per box: 10

Box: 620x620x550mm / 24.4"x24.4"x21.6"

Box Gross Weight: 4.9 Kg
