

Product Information

VicSpacer

PUBLIC SPACES / Hi-FI & HOME CINEMA / PROFISSIONAL AUDIO / WORKSPACES

Description

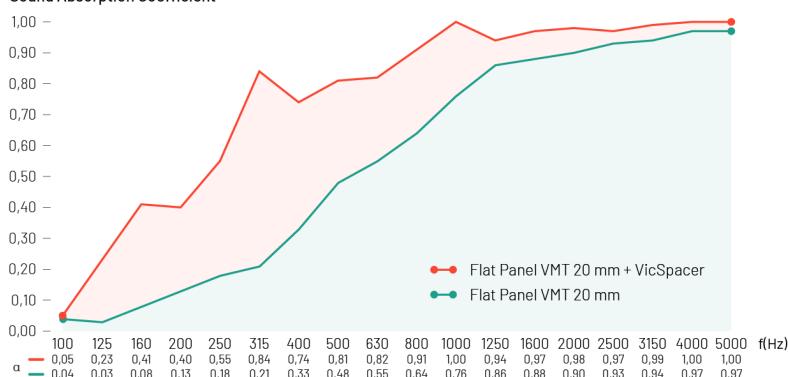

VicSpacer is a new fixation system for Flat Panel VMT. By spacing the panel 40 mm away from the wall or ceiling, VicSpacer helps to enhance the Flat Panel VMT acoustic performance in the medium and low-frequency regions.

The new fixation system used by VicSpacer makes Flat Panel VMT compatible with the VicFix fixation system, either the VicFix Mini or the J Profile System, already being used on other Vicoustic's solutions. VicSpacer can be installed in the ceiling (using VicFix J Profile 2m) and it is possible to use it as Bass Trap, by placing it in the corners (using VicFix Corner Plus). Made from wood and lacquered steel, it was designed to cover the white sides of Flat Panel VMT in a stylish and visually appealing way, available in White, Black and Grey Matte.

VicSpacer will need to be combined with Flat Panel VMT of 20 mm thickness (not included).

Performance

Sound Absorption Coefficient

NRC: 0.85 (VicSpacer + Flat Panel VMT 20mm)

Available Finishes*

Matte Colors

* Different batches may show a color variation

Dimensions**
