

Mega Fuser Bass Trap

Professional Audio

Description

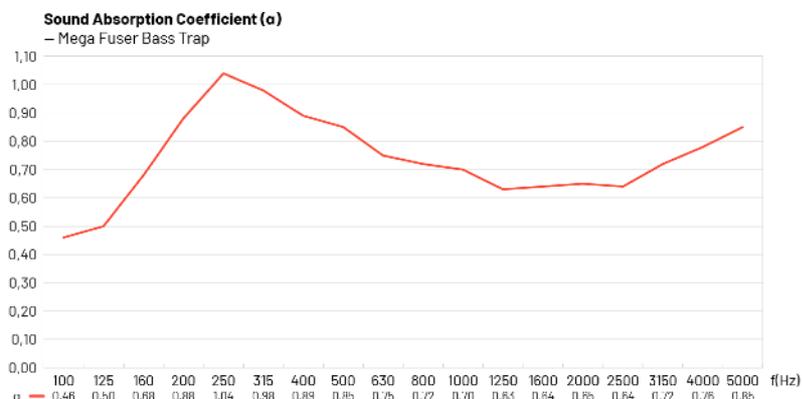

Bass Traps are considered to be one of the best optimized solutions when treating low frequencies. They are also an excellent complement to other acoustic products.

The unique shape of the Mega Fuser Bass Traps allows you to minimize the dramatic effects that result from Resonating Waves, commonly associated with the "boomy" sound often heard in untreated rooms.

Features

- High acoustic performance
- Easy to install
- Affordable

Performance

Available Finishes
