Level

Ceiling Gauge

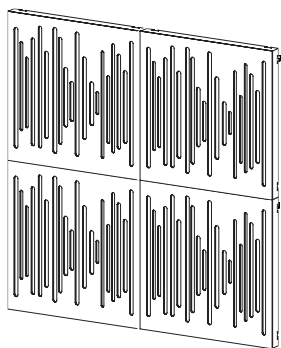

VicFix Suspension Profile 1190 | 46.8"

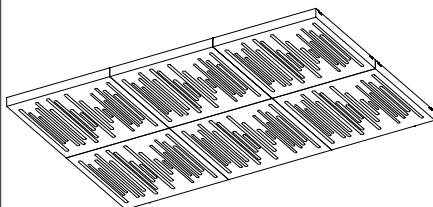

VicFix J Profile 2m | 78.7"

This product can also be installed on wall with the VicFix J Profile 2m (sold separately) and on the ceiling with VicFix Suspension Profile 1190 (sold separately). For corner installation, use the VicFix Corner (sold separately).

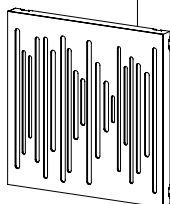

Wall Installation

Ceiling Installation

Corner Installation

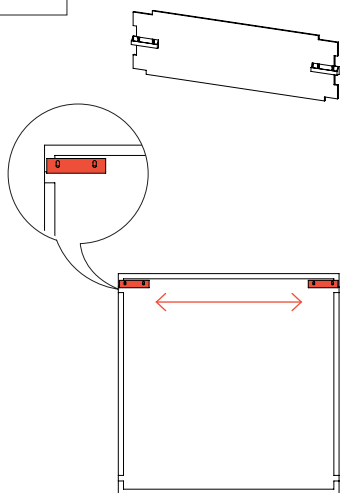

* The Wavewood pattern is merely indicative. This method applies to any products in the VicPattern Ultra MKII range.

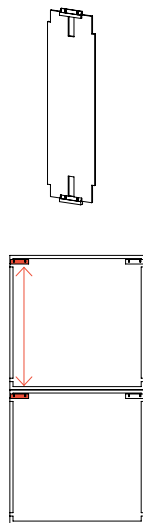

Please note: For ceiling installation do not use the VicFix Mini supplied with the product. Use the VicFix Suspension profile 1190, sold separately. In countries where earthquakes are likely to happen, we recommend using a second locking element, such as an L-profile or a bolt. Vicoustic will not take responsibility for any mistakes/ limitations occurring during installations or any damages resulting from falling panels.

Ways of using the gauge

2

Wall installation - One panel

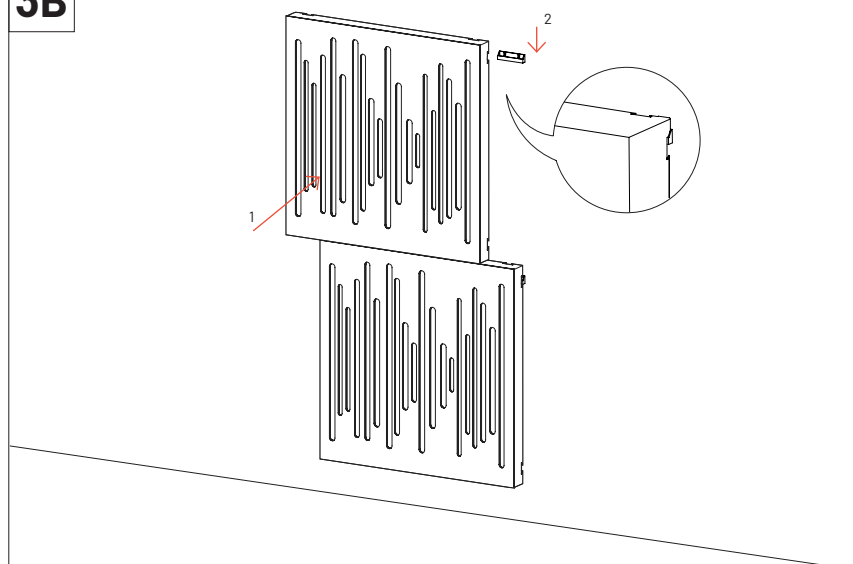

After defining the place where you want to install the panels, start marking the position of the VicFix Mini.

3A

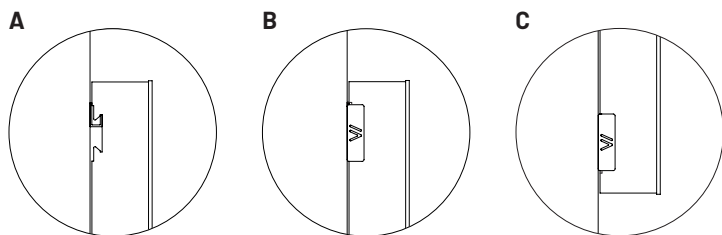

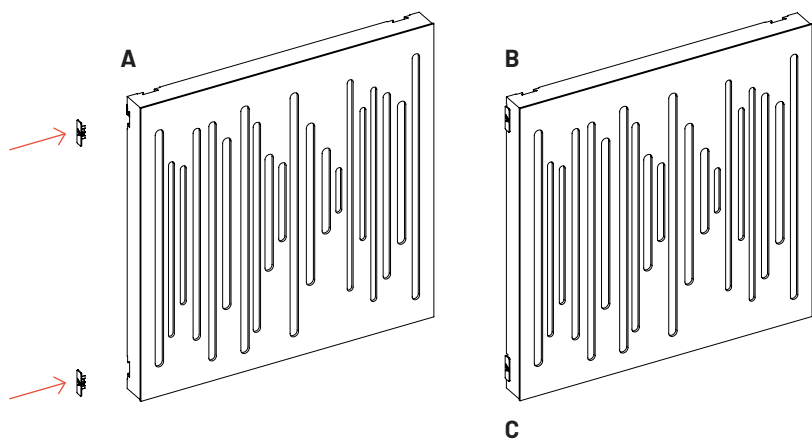

3B

To cover the side panel slots, you can use the VicFix J Profile End Cap (sold separately).
